

Time for a Bite

illustrated by
Gilang Ayyoubi Hartanto

It is time for a lesson. It's time
for the little toman to learn how
to hunt his dinner.

The big toman fish shows him how to hide and wait. They must be silent and still.

He tries to hide and wait next to a big stone.

He is already in trouble.

It's not a rock.

It's an animal!

The grumpy turtle moves
off and scares the tiny
prey.

Little toman fish does his best to catch them.

They have a head start.

As a final try, he dashes out for them, but soon they are gone.

What will he do if he is
unable to catch his own
dinner?

But look!

An idle dragonfly hangs in the middle of a branch. It could be an easier catch.

He leaps up to snatch it.

In his struggle, the little fish
does not see someone is
watching from afar.

Just what the little
fish doesn't need..

...another animal
after his prey.

The dragonfly is clever and the kingfisher struggles to catch him too.

The dragonfly is able to
hide in the roots of a
marsh tree.

So the kingfisher gives up
and dives for a school of
tiny fish instead.

His angle is all off.

He misses all the tiny
fishes and grabs a leaf by
mistake.

An illustration of an underwater scene. In the foreground, a large yellow fish with a white stripe and a large eye is looking towards the right. In the background, a school of small orange fish is swimming away from a kingfisher that is partially visible in the upper right. The water is a mix of light and dark green, with dark spots representing bubbles or light filtering through. The bottom of the scene shows brown rocks and green seaweed.

Now the tiny fishes
see they are in
trouble. They dash
away from the
kingfisher and head
right towards the little
toman fish.

The school is trapped in the middle. If they swim back up, the kingfisher is there. If they swim down, the little toman fish is ready to snatch them.

What a lesson!

It's a lesson in team work.

And now it's time for a bite.

S8

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page www.bookbotkids.com/free-books from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at www.bookbotkids.com.
