

Curly or Not

illustrated by
Ruchi Shah

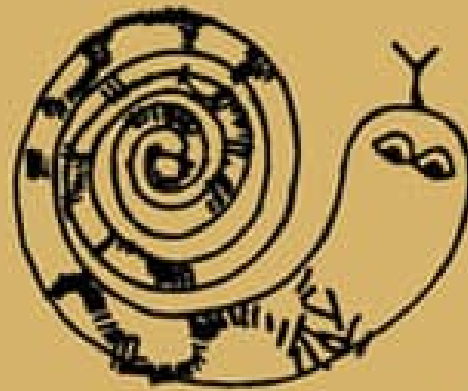

Hair can have a tight
curl to it that makes it
spring.

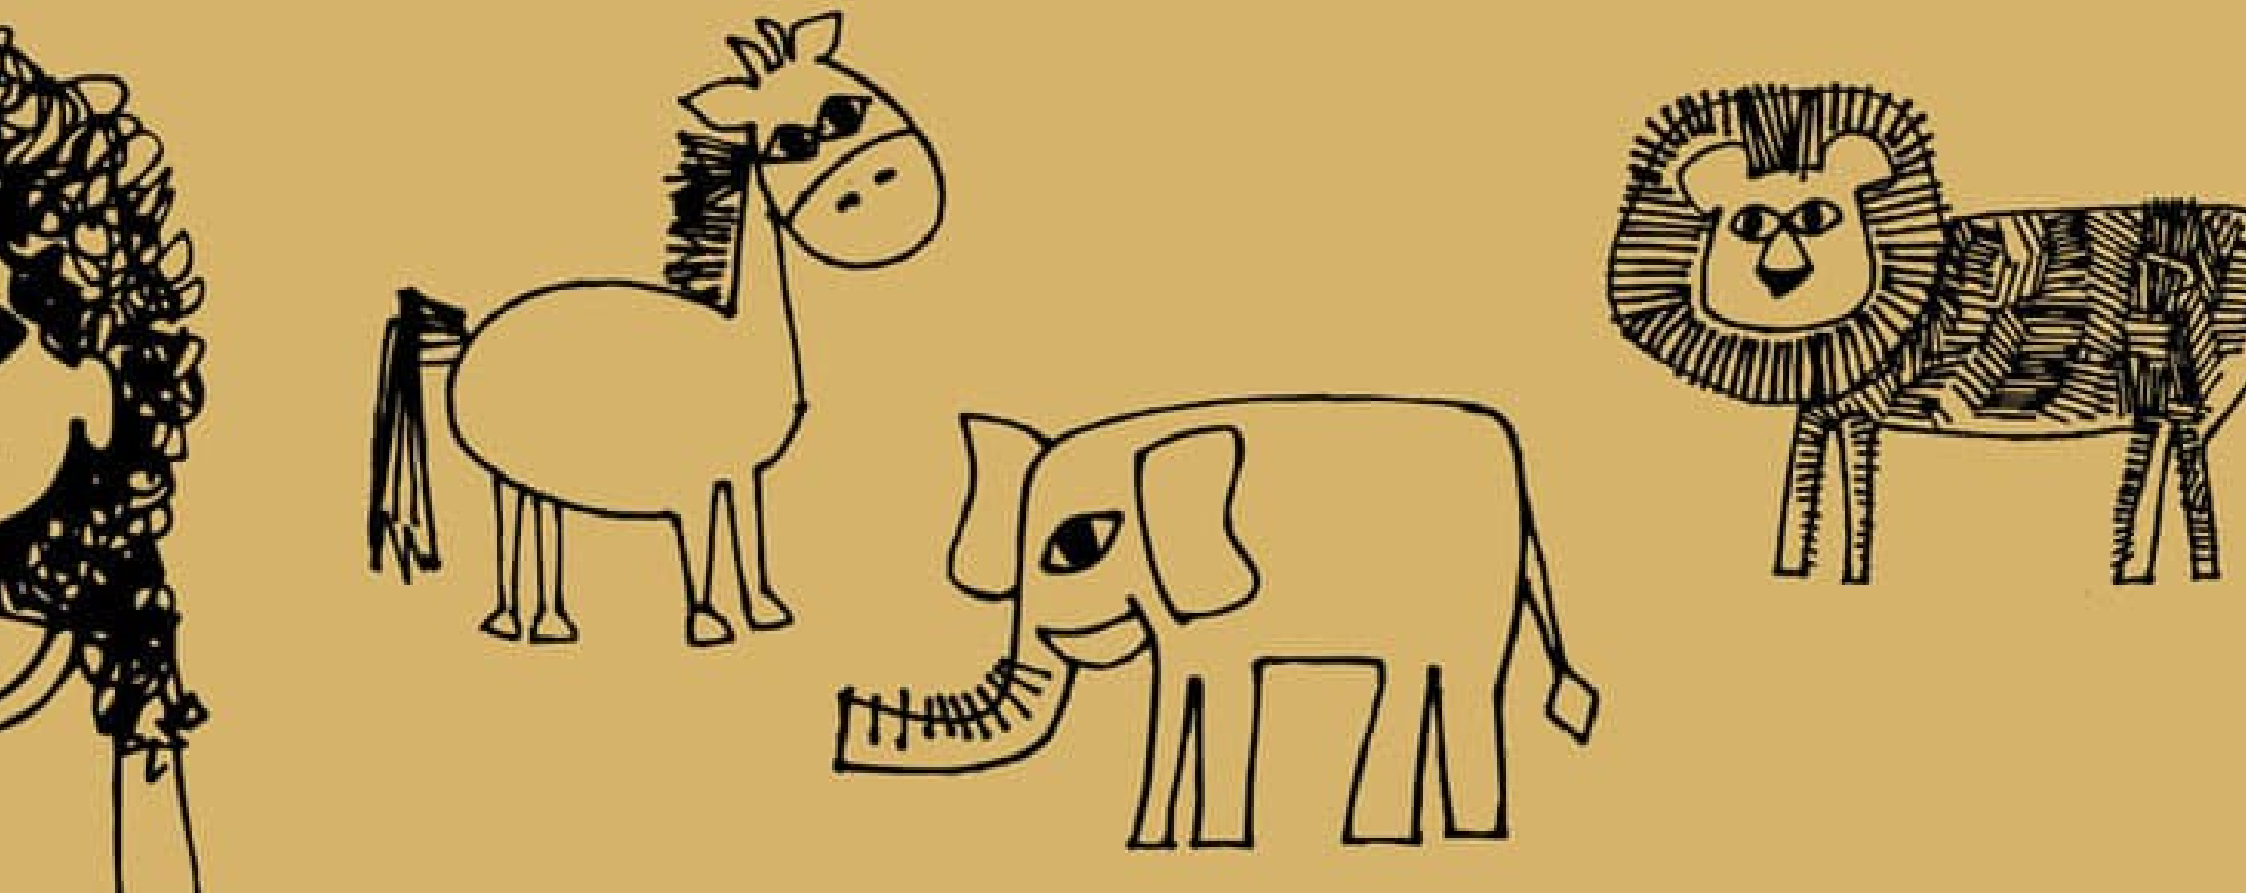

Some hair is
straight. Her
hair is flat on
the ground.

Some animals have a tail
that curls. It can grab.

There are animals that
have straight tails as
well.

There are stairs that
have a curl to them.

They wind.

What else can
be curly or
straight?

Here she is, proud at the top of a hill. The path curls all the way to the top.

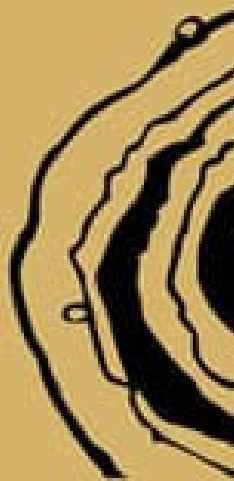

When we draw, we can
make our lines straight.

We can draw
lines that curl to
have a round
part.

Some food is
curly. We make it
coil like a snake.

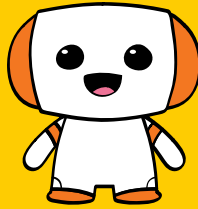

Does the curly snack sound
good to her?

Curly and
straight snacks.
How will she
choose?

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page www.bookbotkids.com/free-books from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at www.bookbotkids.com.
