

# TURN!

Illustrated By Rama Indra

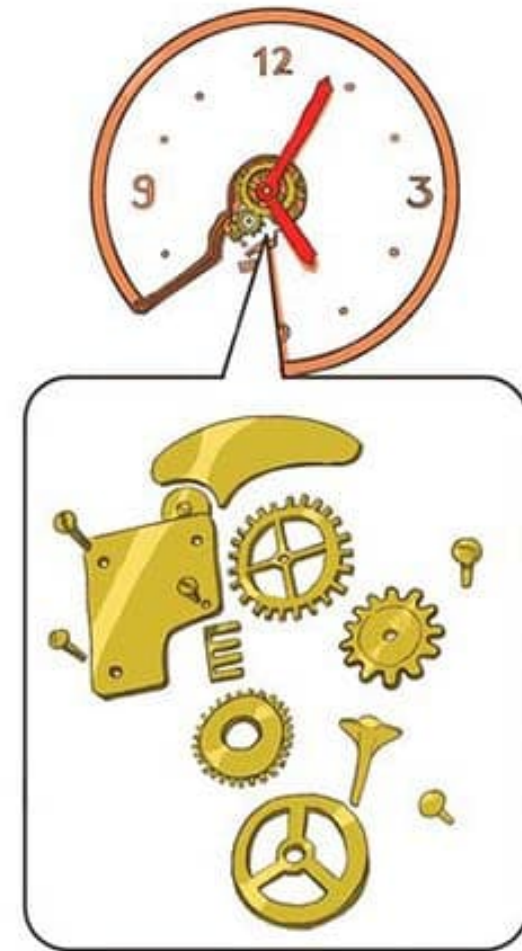

Wheels are on a lot of things. They make them tick.

Some wheels are small  
and some wheels are  
big!

Clocks have wheels in them. They make them tick and tock.

We see a lot of wheels when we go to farms and work sites. It clicks just how many wheels we use.

There are wheels all over the world in in trains, fans and toys.

There are a lot of things that we could not make with no wheels.

We would have to make things by hand. We would move goods on animals.

It might sound fun, but it can be hard to work with animals.

We would have  
to go back to  
the old ways  
with boats and  
carts.

We would miss out  
on some things, but  
not all.

And with no wheels, we  
would have no smog!

Which life would you like?  
To stick with wheels or  
get rid of them?

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page [www.bookbotkids.com/free-books](http://www.bookbotkids.com/free-books) from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at [www.bookbotkids.com](http://www.bookbotkids.com).
