

I Can Spot ...

illustrated by
Lá Studio

A lot of things live
on a farm. The
rooster spots me.

I spot a man.

He may be off to
town to get his mail.

The man spots a
big cow by the
side of the road.

The cow strays
from its field.

It spots a bird.

The bird does not
fail to spot a cat.

The cat looks down
and spots me.

I spot a bug that can
glow in the night.

The bug can
spot the stars
up in the sky.

The stars can
spot us all. They
are up so high.

There are so many
stars in the sky that
I lose count.

The background of the image is a dark, textured night sky. In the upper right corner, a bright yellow crescent moon is surrounded by concentric, glowing yellow circles. The lower half of the image shows a dark, silhouetted landscape with palm trees and a thatched-roof hut. The text is centered in the upper half of the image.

We all go to sleep.

We do not spot a thing.

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page **www.bookbotkids.com/free-books** from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at **www.bookbotkids.com**.
