

Illustrated by
Thiloka Kariyapperuma

Vines

Vines are plants that can
creep up and to the side.
They can be long.

Vines can go up a tree
or some down a branch.
They can hold on.

A vine can have fruit
and flowers. The fruit
grows where the
flowers drop off.

We can plant a vine to go
over a house or an arch.
They are keen to grow up!

Some trees have vines all over. The vines can go up steep spots.

Some vines hold on with these small curls. The curls twist onto a frame.

Vines can fork out so that they go both ways. They can tuck into small spots.

Vines on a farm. They are not tall, but they spread out.

Some vines grow food in the soil.
The green leaves get the sun for
the parts under the ground.

Vines can go wild!

They are keen plants that
can grow very fast.

There are a lot of kinds of vines. See if you can spot some where you live.

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page www.bookbotkids.com/free-books from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at www.bookbotkids.com.
