Economics

Economics is the study of how people use resources, like money and goods, to get the things they need and want. People make choices every day, such as what to buy with their pocket money or

how to save for something special. Businesses also make choices about what products to sell. When there are not enough resources, people have to decide what is most important to them. Learning about economics helps us understand how to make smart decisions with our money.

What is economics about? _____

Why do people need to make choices with their money or resources? _____

How can learning economics help you? _____
