# Government

The government helps  
take care of our community.

It makes rules to keep everyone safe, like  
stopping at a red light. The government also builds  
schools and parks for us to enjoy. People who work in  
the government, like the mayor and police officers,  
help us every day.

Who helps make  
rules in our community?

What does the government build for us?

Who are some people that work in  
the government?
