Map Skills

Maps help us find places.

A map shows where things are, like your home, your school, and the park.

Maps use colors and symbols to show roads, rivers, and buildings.

You can use maps to know which way to go. Some maps have a compass to show directions like north, south, east, and west.

What does a map help us do?

What can you find on a map?

How does a map show directions?
