# Map Skills

Maps help us find places  
and understand where things are.

A map can show a town, a country, or even the world. Maps use different colors and symbols to show things like rivers, roads, or mountains.

Compass roses on maps show the directions north, south, east, and west.

A map key explains what the symbols mean, so it is important to look at it before using the map.

What does a compass rose show on a map?

---

---

Why is a map key important?

---

---

Name two things you might see on a map.
