Map Skills

A map is a picture that shows where places are. Maps can help us find parks, schools, and roads. We use maps to know where we are and where we want to go. Some maps show land and water. Some maps have symbols, like a star for a capital city. A map always has a compass to show directions like north and south.

What does a map help us find?

What do some maps have to show directions?

Name one thing you can find on a map.
