Measurement and Data

Anna has a red pencil and a blue crayon. The pencil is longer than the crayon. Anna puts both on a ruler to measure them. The pencil is 10 centimeters long, and the crayon is 6 centimeters long. Anna writes down their lengths in her notebook. She is happy to learn which one is longer!

Which object is longer, the red pencil or blue crayon?

How many centimeters long is the blue crayon?

What did Anna use to measure her pencil and crayon?
