

Name: _____

Date: _____

Measurement and Data

Rita loves to bake cookies. She uses a measuring cup to add 2 cups of flour, 1 cup of sugar, and half a cup of chocolate chips into a big bowl. Then, she uses a ruler to check if the dough is thick enough.

After baking, Rita uses a timer to make sure the cookies are cooked for 15 minutes.

She shares 12 cookies with her friends and uses a chart to see how many cookies each friend eats.

How many cups of ingredients did Rita use in total?

What tool did Rita use to make sure her cookies baked for the right amount of time?

How many cookies did Rita share with her friends?
