

Name: _____

Date: _____

Seasons

There are four seasons in a year: spring, summer, fall, and winter. In spring, flowers bloom and trees grow new leaves. Summer is hot, and kids like to play outside. In fall, the leaves change colors and fall to the ground. Winter is cold, and sometimes it snows. Each season is special in its own way.

What happens to the trees in spring?

Which season is the hottest?

What do the leaves do in fall?
